Subject index of Volume 104*

Boundary element methods

- Least squares finite element formulation in the time domain for the
dual reciprocity boundary element method in heat conduction,
K.M. Singh and M.S. Kalra (2) 147-172

Collocation method

- Numerical solution of linear elastic problems by spectral collocation
methods, A. Cividini, A. Quarteroni and E. Zampieri (1) 49- 76

Design of programs

- Towards an automated environment in computational mechanics,
W.W. Tworzydło and J.T. Oden (1) 87-143

Dynamics

- Automatic generation and numerical integration of differential-algebraic
equations of multibody dynamics, J. Yen and C.-C. Chou (3) 317-331

Elasticity

- Numerical solution of linear elastic problems by spectral collocation
methods, A. Cividini, A. Quarteroni and E. Zampieri (1) 49- 76
- Non-conforming triangular finite element based on Mindlin plate theory,
H. Katori and T. Nishimura (2) 173-186
- Determination of thermoelastic stresses in the plates which maintain the
tube bundle of a heat exchanger, M. Taghite, H. Lanchon
(Ducauquis) and J. Saint Jean Paulin (2) 261-290
- Numerically well-conditioned expressions for isotropic tensor functions,
C.P. Luehr and F.A. Allahdadi (3) 357-362
- Adaptive *s*-method for linear elastostatics, J. Fish and S. Markolefas (3) 363-396

Finite element and matrix methods

- Finite element analysis for convective heat diffusion with phase change,
D. Sheng, K.B. Axelsson and S. Knutsson (1) 19- 30

* The issue number is given in front of the page numbers.

- Stabilized finite element methods for the velocity–pressure–stress formulation of incompressible flows, M.A. Behr, L.P. Franca and T.E. Tezduyar (1) 31– 48
- Numerical solution of linear elastic problems by spectral collocation methods, A. Cividini, A. Quarteroni and E. Zampieri (1) 49– 76
- Towards an automated environment in computational mechanics, W.W. Tworzydło and J.T. Oden (1) 87–143
- Least squares finite element formulation in the time domain for the dual reciprocity boundary element method in heat conduction, K.M. Singh and M.S. Kalra (2) 147–172
- Non-conforming triangular finite element based on Mindlin plate theory, H. Katori and T. Nishimura (2) 173–186
- A material based finite element analysis of heterogeneous media involving Dirichlet tessellations, S. Ghosh and S.N. Mukhopadhyay (2) 211–247
- Adaptive *s*-method for linear elastostatics, J. Fish and S. Markolefas (3) 363–396
- SUPG finite element computation of compressible flows with the entropy and conservation variables formulations, G.J. Le Beau, S.E. Ray, S.K. Aliabadi and T.E. Tezduyar (3) 397–422

Fluid mechanics

- Stabilized finite element methods for the velocity–pressure–stress formulation of incompressible flows, M.A. Behr, L.P. Franca and T.E. Tezduyar (1) 31– 48
- A new Lagrangian method for steady supercritical shallow water flow computation, J.Y. Yang, S.H. Chang and W.H. Hui (3) 333–355
- SUPG finite element computation of compressible flows with the entropy and conservation variables formulations, G.J. Le Beau, S.E. Ray, S.K. Aliabadi and T.E. Tezduyar (3) 397–422

Heat and diffusion

- Finite element analysis for convective heat diffusion with phase change, D. Sheng, K.B. Axelsson and S. Knutsson (1) 19– 30
- Least squares finite element formulation in the time domain for the dual reciprocity boundary element method in heat conduction, K.M. Singh and M.S. Kalra (2) 147–172

Incompressible and near incompressible media

- Stabilized finite element methods for the velocity–pressure–stress formulation of incompressible flows, M.A. Behr, L.P. Franca and T.E. Tezduyar (1) 31– 48

Material physics

- A material based finite element analysis of heterogeneous media involving Dirichlet tessellations, S. Ghosh and S.N. Mukhopadhyay (2) 211–247

Miscellaneous topics

- A new method for generating inner points of triangulations in two dimensions, O. Friedrich (1) 77– 86

Modern computer architecture

- An algorithm to optimally color a mesh, J.-J. Droux (2) 249–260

Neural networks

- Combination of probabilistic and convex models of uncertainty when scarce knowledge is present on acoustic excitation parameters, I. Elishakoff and P. Colombi (2) 187–209

Nonlinear dynamics of systems

- Automatic generation and numerical integration of differential-algebraic equations of multibody dynamics, J. Yen and C.-C. Chou (3) 317–331

Nonlinear mechanics

- Automatic generation and numerical integration of differential-algebraic equations of multibody dynamics, J. Yen and C.-C. Chou (3) 317–331
- Numerically well-conditioned expressions for isotropic tensor functions, C.P. Luehr and F.A. Allahdadi (3) 357–362

Numerical solution procedures

- An algorithm to optimally color a mesh, J.-J. Droux (2) 249–260
- A comparison of differential quadrature methods for the solution of partial differential equations, G. Mansell, W. Merryfield, B. Shizgal and U. Weinert (3) 295–316
- A new Lagrangian method for steady supercritical shallow water flow computation, J.Y. Yang, S.H. Chang and W.H. Hui (3) 333–355
- Adaptive *s*-method for linear elastostatics, J. Fish and S. Markolefas (3) 363–396

Phase changes

- Finite element analysis for convective heat diffusion with phase change, D. Sheng, K.B. Axelsson and S. Knutsson (1) 19– 30

Problems in physics

- Determination of thermoelastic stresses in the plates which maintain the tube bundle of a heat exchanger, M. Taghite, H. Lanchon (Ducaquis) and J. Saint Jean Paulin (2) 261-290

Shells and plates

- Non-conforming triangular finite element based on Mindlin plate theory, H. Katori and T. Nishimura (2) 173-186

Solutions of ordinary and partial differential equations

- A comparison of differential quadrature methods for the solution of partial differential equations, G. Mansell, W. Merryfield, B. Shizgal and U. Weinert (3) 295-316
- Automatic generation and numerical integration of differential-algebraic equations of multibody dynamics, J. Yen and C.-C. Chou (3) 317-331

Stochastic processes

- Combination of probabilistic and convex models of uncertainty when scarce knowledge is present on acoustic excitation parameters, I. Elishakoff and P. Colombi (2) 187-209

Structural mechanics

- Non-conforming triangular finite element based on Mindlin plate theory, H. Katori and T. Nishimura (2) 173-186
- A material based finite element analysis of heterogeneous media involving Dirichlet tessellations, S. Ghosh and S.N. Mukhopadhyay (2) 211-247

Subsonic flow

- SUPG finite element computation of compressible flows with the entropy and conservation variables formulations, G.J. Le Beau, S.E. Ray, S.K. Aliabadi and T.E. Tezduyar (3) 397-422

Supersonic flow

- SUPG finite element computation of compressible flows with the entropy and conservation variables formulations, G.J. Le Beau, S.E. Ray, S.K. Aliabadi and T.E. Tezduyar (3) 397-422

Thermal effects and thermodynamics

- Determination of thermoelastic stresses in the plates which maintain the tube bundle of a heat exchanger, M. Taghite, H. Lanchon (Ducaquis) and J. Saint Jean Paulin (2) 261-290

Transonic flow

- SUPG finite element computation of compressible flows with the entropy and conservation variables formulations, G.J. Le Beau, S.E. Ray, S.K. Aliabadi and T.E. Tezduyar (3) 397-422

Transport phenomena

- A new Lagrangian method for steady supercritical shallow water flow computation, J.Y. Yang, S.H. Chang and W.H. Hui (3) 333-355

Viscoelastic and viscoplastic media

- Experimental substantiation of an elastoplastic finite element scheme for flat rolling, Z. Malinowski and J.G. Lenard (1) 1- 17

Viscous flow

- Stabilized finite element methods for the velocity-pressure-stress formulation of incompressible flows, M.A. Behr, L.P. Franca and T.E. Tezduyar (1) 31- 48
